

Chloe Simha Marratche

Full Stack Web Developer | SaaS & AI-Powered Web Applications

Israel-based · Remote-ready | +972 55-500-3655 | kloeworkplace@gmail.com | GitHub | LinkedIn | Portfolio | [Web Portfolio](#)

SUMMARY

Full Stack Web Developer building SaaS applications, responsive platforms and business-focused digital products. Experienced across React, JavaScript, Node.js, Express, PostgreSQL, REST APIs, authentication flows, database architecture and AI-assisted development tools. I combine product thinking, clean UI, backend structure, automation and AI workflows to deliver scalable web experiences for real users and business needs.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML, CSS, Responsive UI, Component Architecture, User Flows
Backend: Node.js, Express.js, REST APIs, Authentication Flow, Server-Side Logic, Routes & Controllers
Database: PostgreSQL, SQL, pgAdmin, CRUD Operations, Data Modeling, Database Relationships
AI & Tools: Git, GitHub, VS Code, Lovable, ChatGPT, Runway, AI-assisted prototyping, Debugging

TECHNICAL PROJECTS

Shutafy — Full Stack SaaS Roommate Matching App — In Progress — GitHub

A full stack SaaS application in development, designed to help people in Israel find compatible roommates through lifestyle, budget, city, habits and preference-based criteria.

- Developing app architecture, profile flows, criteria forms, matching logic, messaging screens, authentication planning, PostgreSQL data models and AI-assisted product prototyping.

Simha Concept — Full Stack SaaS Platform for Digital Services — GitHub | Demo

A full stack SaaS-style platform built to present digital services, structure client requests and guide users through a clear service and contact flow.

- Built reusable responsive UI sections, service navigation, contact/conversion flows and AI-assisted content workflows for business growth.

SwissEnergie — Full Stack Service Web Platform — GitHub | Demo

A full stack service platform focused on energy-service presentation, eligibility forms, scalable page structure and backend-ready contact flow.

- Designed professional user journeys with form-based lead capture, responsive UI, service architecture and AI-assisted content structure.

Mon Déménageur Local — Full Stack Service Web Platform — GitHub | Demo

A full stack service platform for a moving company, built to present services clearly and support a structured quote request flow.

- Created service pages, local-business UX, responsive layouts and conversion-focused quote navigation.

Kolam Music — Full Stack Music & Booking Platform — GitHub | Demo

A full stack music and booking platform built to present artists, events, services and booking options through a clear digital experience.

- Structured artist pages, booking flow, event-service sections, responsive interface and AI-assisted creative direction.

Eliyam — Full Stack Digital Growth Platform — GitHub

A full stack digital platform built to present a product, structure the user journey and support a small-budget growth strategy.

- Combined landing page architecture, product flow, social media strategy, advertising direction and AI-assisted creative execution.

EXPERIENCE

Co-Founder & Full Stack Developer Shutafy Present - 2026

- Develop a full stack SaaS roommate-matching application, including user profiles, criteria forms, matching logic, messaging screens and responsive app flows.
- Lead product architecture across frontend structure, REST API planning, authentication flow, PostgreSQL database modeling and AI-assisted prototyping.

Full Stack Web Developer & Digital Builder Simha Concept 2026 - 2024

- Built responsive websites, SaaS-style platforms and digital service flows for businesses, artists and service brands using a full stack product approach.
- Integrated AI tools into the creative and development process to accelerate prototyping, content systems, UI direction and client-ready digital experiences.

Combat Soldier & Reserve Duty Border Police / Battalion 1871 2026 - 2023

- Served as a combat soldier during wartime in high-pressure security environments, developing discipline, resilience, teamwork, responsibility and fast decision-making.
- Completed reserve duty (miluim) through 2026, demonstrating commitment, adaptability and strong work ethic alongside studies and professional development.

EDUCATION

Full Stack Development & AI Developers Institute, Ramat Gan 2026 - 2025

- Intensive full-time bootcamp focused on React, JavaScript, Node.js, Express, PostgreSQL, REST APIs, Git, GitHub and AI tools.

Economics & Entrepreneurship with Data Science Reichman University / IDC Herzliya 2026 - 2025

- Studied in English in an international environment, strengthening product thinking, business strategy and analytical skills.
